### **AIRAM SHIPS PAIR OF PNEUMATIC PRESSES FOR INDUSTRIAL MAINTENANCE APPLICATION**

Covington, Ohio—(February 15, 2013) Airam Press Co. Ltd., shipped two 7-ton custom-engineered pneumatic presses to a customer requiring a flexible production system for its rolling toolbox product line. The built-to-order air presses will be used for pre-punching in a variety of configurations. The manufacturer selected the pneumatic pair because of Airam's ability to cost-effectively custom design the presses to meet its unique requirements.

The high-performance presses offer the fabricator small footprints helping to conserve valuable floor space. The Airam press is an easy-to-install, low-cost alternative with a production uptime of 98 percent. Maintenance is minimal. With fewer moving parts and no recirculating lubrication, the only components requiring grease are the guideposts.

Airam's leadership and technical staff offer extensive experience, technical knowledge and in-depth application engineering expertise to assist customers with selecting the right production system. In addition to the press, Airam has designed turnkey systems that have included tooling, feeding equipment, part handling automation, and other ancillary equipment. Airam cost effectively custom designs presses to fit customers' individual needs. Airam also has a comprehensive spare parts inventory as well as rebuild and preventative maintenance programs to provide customers with key support services. Committed to equipping customers with the tools they need to be competitive, Airam offers flexible production systems in tandem or stand-alone configurations with the capability to manufacture quality parts at low cost. Airam has manufactured and shipped more than 5,000 presses worldwide.
